

NAAN MUDHALVAN

Project Title: Auto Ticket Classification using Flow Designer

Team ID: SWTID-2026-1853

Team size: 5

Team Leader Name: Vaishnavi M

Team Members: Akshaya A, Subasini R, Abisha M, Muthu Lekshmi U

Milestone 1: Requirement Analysis & Planning

Activity 1: Business Use Case

Business Requirements:

The system must:

1. Automatically classify IT tickets based on the issue description.
2. Assign both Category and Subcategory without manual intervention.
3. Support dependent choice logic between Category and Subcategory.
4. Send an automated email notification to the caller upon ticket creation.
5. Store ticket information in a structured and standardized format.
6. Ensure easy maintenance and future scalability.

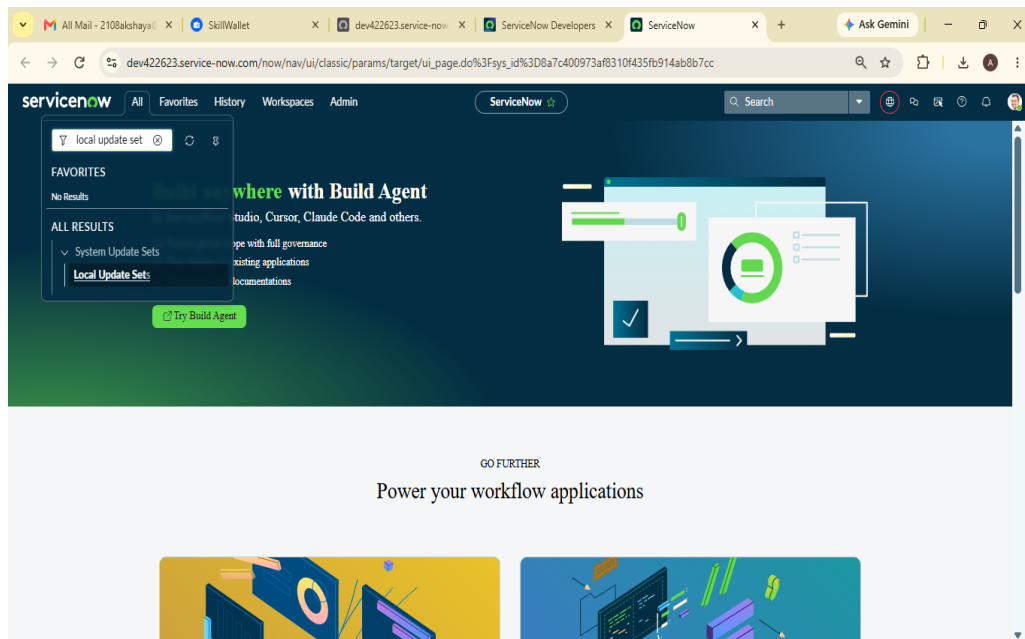

Activity 2: Creation of New Update Set

Navigation Steps:

- Go to All menus → Search for Update set.
- Under System Update Sets → Select Local Update Sets.
- Click the New button on the top right corner of the page.
- Name: Project Update Set.
- State: In progress.

- Application: Global.
- Then Save the Form.
- Under Related links Click on the Make This My Current Set.
- Then the Created Update Set will appear as Current.

Activity 3: Navigation steps in Picture View

- Open ServiceNow Personal Developer Instance (PDI).
- Click on All menu -> Type Flow Designer in the filter navigator.
- Click on Flow Designer under Process Automation.
- A new tab will open with the Flow Designer interface.

Flow Designer Studio:

The screenshot displays the ServiceNow Flow Designer Studio interface. At the top, there's a navigation bar with tabs for Playbooks, Flows (selected), Subflows, Triggers, Actions, and Decision tables. A notification banner at the top center states: "New version available: Upgrade to get the latest Workflow Studio features. [Learn more](#)".

Below the navigation bar, the "Flows" section is active, showing a list of flows. The list has columns for Name, Application, Status, Active, Updated, and Updated by. The flows listed are:

Name	Application	Status	Active	Updated	Updated by
Application Intake Request Flow (Deprecated)	Application Intake	Published	false	2026-09-22 11:16:51	system
Application Intake Request V2	Application Intake	Published	true	2026-09-22 11:15:32	system
Benchmark Recommendation Evaluator	Benchmarks Spoke	Published	true	2026-06-12 14:42:42	system
Business process approval flow	Global	Published	true	2020-09-27 22:06:13	admin
Change - Cloud Infrastructure - Authorize	Global	Published	true	2020-11-11 07:08:05	admin
Change - Conflict Detection	Global	Published	true	2026-06-12 14:33:00	system
Change - Emergency - Authorize	Global	Published	true	2020-10-06 05:39:49	admin
Change - Emergency - Implement	Global	Published	true	2020-09-23 05:06:26	admin
Change - Emergency - Review	Global	Published	true	2020-10-27 04:18:08	admin
Change - Normal - Assess	Global	Published	true	2020-10-06 05:37:05	admin
Change - Normal - Authorize	Global	Published	true	2020-10-06 05:38:35	admin
Change - Normal - Implement	Global	Published	true	2020-09-23 04:23:59	admin

On the right side of the interface, there's a sidebar with sections for "Pick up where you left off" (listing Sub-Production tasks, Production tasks, and Multi-factor Authentication), "Latest updates" (showing recent modifications by System Administrator), and "Resources".
